

# Vertec – Project ERP for your success

Vertec-Project ERP was developed to meet the dedicated needs of the service industry. The software features a simple and efficient entry system for the services rendered by your employees, a transparent and flexible project management and sophisticated analytics thereby facilitating the profitability and success of your company.

## Vertec-Project ERP offers more

- ▶ Easy and precise entry of services rendered
- ▶ Management of projects and requirements
- ▶ Monitoring of issues and deadlines
- ▶ Generating reports with integrated report designer
- ▶ Document management and automation
- ▶ Multi-firm, multi-language and multi-currency support
- ▶ Microsoft Word and Outlook integration, export to Excel
- ▶ One consistent customer database for CRM and project management

Tailor-made for service entry, Vertec offers a modular software portfolio for project management, billing, budget control, CRM (customer relationship management), resource planning and benchmarking (business intelligence) to support you professionally.

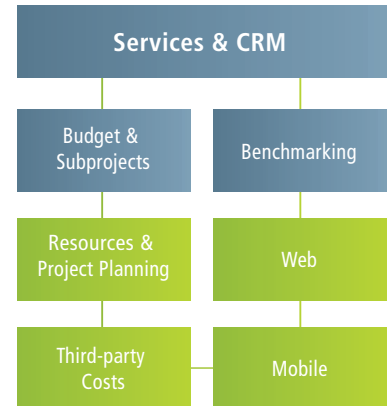

Pay only for features and functionalities that you really need. Depending on the complexity of your business, you can choose either the Easy, Standard or Expert package. Thanks to the open architecture, you can upgrade your package anytime.

## Unique flexibility

The flexibility of Vertec-Project ERP is unsurpassed. Through simple parameterization, the software can be easily and quickly customized to meet your specific needs.

For each service sector, sophisticated features are provided, which can be easily extended and adapted.

◀ *With the Benchmarking module, you have every aspect of your profitability under control.*

## Vertec Services & CRM
